

Architectural Index

This section of the index is comprised of questions that architects should be concerned with when designing and planning schools. Each question is associated with guidelines that offer advice on the specific issue.

Sect Page

- 1.2.3 28 How can crime be reduced through design?
- 1.2.3 28 How can design help reduce overcrowding in schools?
- 1.2.2 24 How can design help students achieve greater academic success?

- 1.2.2 24 How many students should be in one classroom?
- 1.2.2 26 What is the ideal school population?
- 1.2.2 25 Should elementary schools be divided up?
- 2.2.1 84 How should lighting intensity levels be determined?
- 2.2.1 85 How can lighting arrangements determine the quality of a space?
- 2.2.1 90 What kind of lighting conditions should be avoided?
- 2.2.3 98 How can electric lighting be used in conjunction with day lighting?
- 2.2.3 99 How do certain types of electric lighting affect the quality of a space?
- 2.2.4 104 What role does acoustics play in school design?
- 2.2.4 106 How can external noise be reduced?
- 2.2.2 93 How can energy costs be reduced?
- 2.2.2 94 What happens to daylit rooms on a cloudy day?
- 2.2.2 94 How can effective daylight design be achieved?
- 3.3.4 373
- 2.2.2 95 How can daylight in a room be controlled?
- 3.1.4 314
- 2.2.5 109 How can good indoor air quality be achieved and maintained?
- 3.1.4 314
- 2.2.5 109 What affects indoor air quality?
- 2.2.6 112 How can the comfort of a space be controlled?
- 2.4.6 172
- 2.7.3 263
- 2.2.6 112 What are the ideal conditions for comfort in the classroom?
- 1.2.1 19 What are the school's needs that can be met by the local community?
- 1.2.1 18 What are the local community's needs that can be met by the school?
- 1.2.1 20 What are the important site planning criteria, and what is the best way to evaluate them?
- 2.1.1 68 What kind of spaces will make a student feel more comfortable?
- 2.1.1 69 How can the home be used as a template for school design?
- 2.1.1 70 How should private and public spaces be organized in school design?
- 2.1.2 72 How should spaces be designed so that they may accommodate change in the future?
- 2.1.2 73 What kind of spaces should be included in the design of a school that may need to expand in the future?
- 2.1.3 76 What principles should be kept in mind to keep spaces universally accessible?
- 2.1.3 77 How do considerations for disabled students and teachers affect school design?
- 1.1.3 12 How can a school building be designed to represent the community?
- 1.1.3 13 How can the school be designed to produce pride within the community?
- 1.1.3 14 What is the process for involving the community when designing a school?

- 1.1.2 9 How can the design of a school communicate the school's role in the community?
- 1.1.1 5 What is a beautiful school?
- 1.1.1 5 Why design a beautiful school?
- 1.1.1 7 How can a school be designed to care for the community?
- 1.2.4 33 What gives a place a sense of community?
- 1.2.4 34 How can the school determine the sense of community?
- 1.3.5 57 What is the ideal way to organize an administration?
- 1.3.5 58 What are the different responsibilities of an administration?
- 1.3.5 59 What are the different components of an administration?
- 1.3.5 58 Where is the best location for a principal's suite?
- 1.3.5 57 Where is the best location for a counselor's office?
- 1.3.5 58 Where is the best location for an operation's office?
- 1.3.3 49 What are the different components of a media center?
- 1.3.3 48 What are the key issues when determining a media center's location?
- 1.3.3 48 What is the first step in planning for a new media center?
- 1.3.3 49 How does a media center relate to the different departments within the school?
- 2.1.4 80 What type of space do computers require?
- 2.1.4 79 How should technology be incorporated into schools?
- 3.1.1 295 What is the average age of a school building?
- 3.1.1 296 Which materials should be long lasting?
- 3.1.1 296 What are the benefits of investing in both long lasting and not long lasting materials?
- 3.1.2 299 What factors should be considered when deciding how to protect the building from external forces?
- 3.1.2 299 What determines the materials that should be used to protect the building from external forces?
- 3.1.3 305 What factors should be considered when deciding where to place interior walls?
- 3.1.3 306 What determines the materials that should be used for interior walls?
- 3.1.5 319
- 1.3.4 53 Why is there a need for gathering places within schools?
- 1.3.4 54 What types of gathering places are within schools?
- 1.3.4 55 What is building commissioning?
- 3.2.8 356 What are the goals of building commissioning?
- 3.2.8 354 What are the benefits of building commissioning?
- 3.2.8 356 What is the cost of building commissioning?
- 3.2.8 354 How is a commissioning agent selected?
- 3.2.4 340 What are the cost benefits for controlling floor grit?
- 3.2.4 341 What should a good floor matting be doing for a school?
- 3.2.6 348 How can grounds be designed to maintain themselves?
- 3.2.6 347 How can a school have beautiful grounds and save money?
- 3.2.6 348 How can a beautiful landscape have easy maintenance?
- 3.3.2 361 How to choose the appropriate HVAC system?
- 3.3.2 362 What is a unit ventilator?
- 3.3.2 363 What is a variable air volume system?
- 3.3.2 363 What is a VAV?
- 3.3.2 364 What is a package unit?

Sect	Page	
3.3.2	364	What is a loop heat pump?
3.3.2	365	What is a geothermal heat pump?
3.3.2	366	How does natural ventilation affect an HVAC system?
1.3.2	45	What should be kept in mind when planning and designing athletic facilities on a campus?
1.3.2	45	Are athletic facilities used for other things besides sporting events; if so, what are they?
1.3.2	46	Do schools prefer that their athletic facilities be a main focus on campus?
2.6.2	234	How can an eating environment be designed so that it is less institutional?
2.6.1	231	What is the minimum width of a corridor in a school building?
2.6.1	230	What are the major problems associated with hallways?
2.6.1	232	How can hallways be made safer?
2.7.4	266	What are the types and sizes of teacher support spaces?
2.4.6	171	What are the advantages and disadvantages of various proportions?
2.4.2	155	What are the spatial needs of various learning activities?
2.4.2	157	What learning activities should be considered when designing a school?
2.4.1	152	
2.4.3	160	
2.5.8	215	
2.5.7	208	
2.4.2	158	What criteria should the school design be based on to accommodate the needs of the learners?
2.4.2	155	How can schools be built to last at least 50 years and still accommodate changes in teaching strategies and technology?
2.4.1	152	How can every environment within a school be built to accommodate learning?
2.7.3	262	How much personal space does each student need?
2.7.3	263	What principles should be kept in mind when designing child scaled elements?
2.7.2	253	What are the advantages of windows?
2.7.2	253	What are the various types of windows?
2.6.5	244	Where should drinking fountains be located?
2.6.4	240	How many toilets are needed for a school?
2.6.4	241	Where should restrooms be placed?
2.6.3	237	Where are weather protected transition elements needed?
2.6.3	238	What are weather protected transition elements?
2.6.3	239	How should weather protected transition elements be utilized?
2.5.1	178	What criteria should be considered when designing lecturing places?
3.3.1	359	What is a well-tuned system?
3.3.1	359	How should a well-tuned system be designed?
2.4.5	167	How can school grounds serve as an educational landscape?
2.4.5	167	What should be considered when designing the school grounds?
2.3.3	123	
2.4.7	174	What criteria should be considered when choosing colors?
3.1.5	319	What are finishes for daily contact?
2.4.7	174	What are the effects on people from various colors?
2.4.7	174	How can spatial character be enhanced?

Sect Page

- 2.4.7 174 What is color?
- 2.4.7 175 How can the quality of lighting and environmental conditions within the school building be improved?
- 3.3.4 372 What determines the actual amount of light needed?
- 3.3.4 373 What determines the type of electric lighting to be used?
- 3.3.4 373 How can high lighting efficiency be assured?
- 3.3.4 375 What is a light fixture composed of?
- 3.3.3 348 What are the advantages of energy conserving HVAC systems?
- 3.3.3 368 How can unwanted heat gain be prevented?
- 3.3.3 369 What increases the efficiency of an energy distribution system?
- 3.3.3 370 How can the design performance of a building be tested?
- 2.6.6 246 What guidelines should be met in the design of a student health station?
- 2.7.1 250 How is openness created?
- 2.7.1 251 How is a healthy and efficient learning environment created?
- 1.3.1 41 How should the design of the landscape be approached?
- 3.1.4 313 What needs to be considered when designing an entry way?
- 2.3.1 116
- 3.1.4 313 What needs to be considered when designing a window?
- 2.7.2 253
- 3.1.4 314 How can water be directed out and away from a building?
- 3.1.4 315 How can the thermal qualities of a building be controlled?
- 3.1.4 315 How can the acoustics of a building be controlled?
- 3.1.4 317 What makes the school accessible?
- 1.3.6 61 How can the building design allow for adult spaces?
- 2.7.6 274 What are the different types of displays most commonly used in schools?
- 2.7.6 275 Are there any specific needs concerning the environment around a display?
- 2.7.5 270 What are the major areas that need storage in schools?
- 2.7.5 271 Should all storage spaces be designed for flexibility?
- 2.7.8 284 What are ways that computer stations can be joined together within a classroom?
- 2.7.8 285 Are there certain types of furniture and equipment conducive to particular activities?
- 2.7.8 288 What are the guidelines of basic classroom furniture and equipment?
- 2.7.7 279 Are there certain surfaces conducive to certain learning activities?
- 2.7.7 280 What are some proven materials used as surfaces for learning?
- 2.7.7 281 What are the guidelines for learning surfaces?
- 2.5.2 181 How should an environment be designed to accommodate discussion?
- 2.5.2 183 Are there any ideal furniture configurations for group discussion?
- 2.5.9 222 What are some different types of playground design?
- 2.5.9 224 What are the needs and issues that are concerned with team sports?
- 2.5.3 186 How can a reading space be designed to be generous?
- 2.5.3 187 What are some strategies for making a reading space more autonomous?
- 2.5.4 190 What are the important spaces that organize an art facility?
- 2.5.4 191 How does a designer fashion environments that foster creativity?
- 2.5.4 191 What are the problematic issues concerning art facilities?
- 2.4.4 163 Are there ways to design learning environments that share resources?

Sect	Page	
2.4.4	163	What are instructional clusters?
2.4.4	164	How can an open plan design be less distracting to students?
1.2.5	37	In what way can a facility's design promote a collaboration of learning opportunities?
2.3.1	116	How can access to the school be controlled?
2.3.1	117	How should traffic be controlled?
2.3.2	119	What areas in the school should be monitored?
2.3.2	119	How can the design allow for surveillance?
2.3.3	123	
2.3.5	134	
2.3.5	134	What should be considered when designing for parking?
2.3.7	143	Where should playgrounds be located?
2.3.7	144	What should be considered when designing a playground?
2.5.8	215	What should be considered when designing a stage?
2.5.7	208	What should be considered when designing a room for music?
3.2.5	343	How can trouble spots be avoided?
3.2.5	343	How can people be prevented from harming the building?
3.2.5	345	Who should be consulted when designing for easy maintenance?
3.2.7	351	Where should maintenance storage be located?
3.2.7	352	What should be considered when designing for maintenance storage?
2.3.6	137	What spatial elements are keys to designing a safe laboratory?
2.3.6	140	What safety equipment and devices should be specified for laboratory?
2.3.6	140	What safety standards should be followed in lab design?
2.5.5	196	How should the science lab be integrated with other learning environments?
2.5.5	197	What components make up the science laboratory?
2.5.6	203	What components make up the vocational laboratory?
2.3.4	126	What steps can be taken to make a school disaster resistant?

Educational Index

This section of the index is comprised of questions that educators should be concerned with when designing and planning schools. Each question is associated with guidelines that offer advice on the specific issue.

Sect	Page	
1.2.3	29	How can more autonomy be achieved in the staff and administration?
1.2.3	29	How can crime and other negative effects be reduced in school?
1.2.3	29	How can students feel more positive and connected to their school?
1.2.3	30	How can one principal run two different schools?
1.2.2	24	What is the best grade composition?
1.2.2	24	What is the ideal school population?
1.2.2	25	When does a classroom become overcrowded?
2.2.4	106	How can distractions from outside noises be avoided?
2.2.2	93	How can energy costs be reduced?
3.3.1	359	
3.3.4	372	
3.3.3	368	
2.2.3	98	
2.2.2	93	Do all classrooms need to be daylit?
2.2.2	94	How does daylight benefit students?
2.2.6	112	What makes a classroom comfortable?
2.4.6	171	
3.1.2	298	
1.2.1	18	What are the needs of the community that can be met by a school?
1.2.1	19	Why is site planning so important?
1.2.1	20	What is the best way to determine if a site is right for a school?
2.1.1	68	How can a student's anxiety about being away from home be reduced?
2.1.1	69	How can a student's sense of independence be increased?
2.1.1	69	What size groups are most beneficial to students?
2.1.2	72	How can a school accommodate changing teaching techniques?
2.1.2	74	How should a school respond to a changing community?
2.1.2	73	How can a school allow for future growth?
2.1.3	76	How can students and teachers with disabilities share the same activities as other students and teachers?
1.1.3	13	How can a beautiful school be maintained?
1.1.3	13	How can parent and community involvement be increased?
1.2.4	32	
1.1.3	13	How can students be taught the value of planning?
1.1.3	15	How can school and community pride be increased?
1.3.1	41	
1.1.3	12	How can the community participate in the designing of schools?
1.1.3	14	How can the input and participation of the community be coordinated?
1.1.3	13	Who qualifies as the ideal school representative?
1.1.2	9	How can more homebuyers be convinced to buy within a particular city?
1.1.2	10	How can the importance of knowledge be addressed?
1.1.2	10	How can discourse among students and faculty increase?
1.1.1	5	What is a beautiful school?
1.1.1	5	Why build a beautiful school?

Sect Page

- 1.1.1 6 How can student and community motivation be increased?
- 1.1.1 6 How can the community become more attractive?
- 1.1.1 7 How can a school be given a sense of identity?
- 1.2.4 34 How can life-long learning and real-life learning be promoted?
- 1.2.4 34 What are the advantages and disadvantages of sharing spaces?
- 1.3.5 58 When is it necessary to have a vice-principal?
- 1.3.3 48 How can the media center help all of the departments simultaneously?
- 2.1.4 79 How many computers should be provided for students?
- 2.1.4 80 How can computers aid in the education of students?
- 2.1.4 80 How should technology be incorporated into schools?
- 3.1.5 319 What determines student/teacher responses to a building?
- 3.1.1 295 How can student/teacher performance be improved?
- 3.1.1 296 How can more money be allotted for educational programs?
- 3.1.3 305 How can distractions be reduced?
- 1.2.1 17 Why is site planning so important?
- 1.3.4 53 Why is there a need for gathering places within schools?
- 1.3.4 54 What are some types of gathering places within schools?
- 3.2.8 354 What is building commissioning?
- 3.2.8 355 What are the goals of building commissioning?
- 3.2.8 354 What are the benefits of building commissioning?
- 3.2.8 356 What is the cost of building commissioning?
- 3.2.8 356 How is a commissioning agent selected?
- 3.2.2 332 What is cleaning for health?
- 3.2.2 332 What are the key factors for cleaning for health?
- 3.2.2 333 How does a school make the transition to clean for health?
- 3.2.4 340 What are the cost benefits for controlling floor grit?
- 3.2.4 341 What should a good floor matting be doing for a school?
- 3.2.6 347 How can grounds be designed to maintain themselves?
- 3.2.6 347 How can a school have beautiful grounds and save money?
- 3.2.6 348 How can a beautiful landscape have easy maintenance?
- 3.3.2 361 How to choose the appropriate HVAC system?
- 3.3.2 362 What is a unit ventilator?
- 3.3.2 363 What is a variable air volume system?
- 3.3.2 364 What is a package unit?
- 3.3.2 364 What is a loop heat pump?
- 3.3.2 365 What is geothermal heat pump?
- 3.3.2 366 How does natural ventilation affect an HVAC system?
- 3.2.7 351 How to use maintenance storage wisely?
- 1.3.2 45 How can athletic facilities be used for other things besides sports?
- 1.3.2 46 Is it true that non-student athletes make better grades than student athletes?
- 1.3.2 46 Is it wrong if the school focuses more on sports than education, and if so, how can the focus of a school become more education oriented through the athletic facilities?
- 2.6.2 234 Can a food court really work?
- 2.6.1 233 Can hallways be places for students to learn?
- 2.6.1 231 How can hallways be made safer?
- 2.7.4 267 Where should a teacher locate his or her teaching space within a classroom?
- 2.4.6 171 How can the quality of the learning environment be improved?

Sect	Page	
2.4.6	171	How can group interaction be encouraged?
2.4.2	155	How can frustration within the teaching staff be reduced?
2.4.2	156	How is academic achievement increased?
2.4.1	152	How can every student be provided with multiple learning approaches and activities?
2.4.1	153	How can the learning process of every child be considered?
2.4.1	153	How can the school respond well to changes in society and education?
2.7.3	262	How can creativity be promoted among students?
2.7.3	263	How can students learn and function more efficiently?
2.7.2	256	How can eye fatigue be reduced among students?
2.2.1	84	
2.6.5	244	What impacts the productivity of students?
2.6.5	245	How can healthy habits be promoted at school?
2.6.4	240	How can good personal hygiene habits be developed and encouraged at school?
2.6.4	241	How can discipline be kept among students?
2.6.3	240	How can socialization be promoted?
2.5.1	178	What is an important part of the educational experience of every child?
3.3.1	359	What creates a good learning environment and aids in learning?
2.4.5	167	How can school grounds be used as an instructional resource?
2.4.5	168	What can the school district do to ensure the school grounds will be used as an educational landscape?
2.4.5	168	What are the advantages of outdoor learning?
2.4.7	174	How can the educational experience and environment be improved?
3.3.4	373	How can student performance increase?
3.2.3	336	How can a healthy environment be maintained?
3.2.1	327	
2.2.5	109	
3.2.3	328	How can a school save money?
3.2.1	330	
2.6.6	247	How can a child feel more at ease when in a health station?
2.7.1	251	How can the safety of the students be assured?
1.3.1	41	
3.1.4	311	
3.1.2	298	
3.1.4	311	How can the school maintain its durability?
3.1.2	298	
1.3.6	61	How can the school be a learning environment for adults?
1.3.6	62	How can the school encourage community support?
1.3.6	61	How can the school promote life long learning?
2.2.1	84	What type of lighting is needed for individual activities?
2.2.3	99	
2.2.5	110	How can drowsiness be reduced among students?
2.7.6	274	What is the best way to get a message across to students?
2.7.6	275	Where is the best place to put a specific type of display?
2.7.6	276	What is the best way to compose a display?
2.7.8	285	Are there certain types of furniture and equipment conducive to particular activities?
2.7.8	284	What are the guidelines of basic classroom furniture and equipment?
2.7.8	286	What are the major issues dealing with computer ergonomics for students?

Sect Page

- 2.7.7 280 How much space should be given to lecturing at the front of a classroom?
- 2.5.2 181 What can teachers do to organize discussion?
- 2.5.2 182 What are appropriate group sizes for discussion?
- 2.5.9 222 What are some ways that children can learn from playgrounds?
- 2.5.9 223 Should games be played in class to help children learn?
- 2.5.3 186 Should students be allowed to choose their own reading space?
- 2.5.4 190 How should the art facilities collaborate with other educational disciplines?
- 2.4.4 163 What are types of shared resources that work well within schools?
- 2.4.4 165 What are the benefits of sharing resources?
- 2.4.4 163 Is there a way for students to be less distracted by shared and open spaces?
- 1.2.5 137 What are some important interrelated disciplines?
- 2.3.1 116 How can school safety be ensured?
- 2.3.2 119
- 2.3.3 123
- 2.3.4 126
- 2.3.5 134
- 2.3.7 143
- 3.1.3 305
- 2.7.1 250
- 1.3.1 41
- 3.1.4 311
- 3.1.2 298
- 2.3.1 116 How can behavior be controlled?
- 2.3.2 119
- 2.7.1 250
- 2.3.2 119 What areas in the school should be monitored?
- 2.3.3 123 How can a sense of pride and community within a school be strengthened?
- 2.3.5 134 How can vandalism decrease?
- 2.3.7 143 How can misuse of playground equipment be avoided?
- 2.4.3 160 What type of learning activities should a school provide?
- 2.5.8 215
- 2.4.3 160 What type of teaching strategies should a school provide?
- 3.2.5 343 How can maintenance time and cost be reduced?
- 3.2.7 351 What should be stored in maintenance storage areas?
- 3.2.7 351 How can indoor air quality problems be avoided?
- 2.3.6 137 What needs to be done in labs to ensure safety?
- 2.3.6 137 What are the safety standards for labs?
- 2.5.5 196 What learning strategies are being applied to science learning?
- 2.5.5 196 What is the difference between elementary labs and high school labs?
- 2.5.5 196 In what ways can the lab be integrated with the learning environment?
- 2.5.6 203 How does a Vocational Lab differ from a Science Lab?
- 2.3.4 126 What should the role of a school be before, during, and after a natural disaster?
- 2.3.4 126 What are some helpful resources in dealing with natural disasters in schools?
